Crop Connections Subscriber:
It’s good to see a Kansas Mesonet precipitation map with some green on it! Here’s hoping you were fortunate to be in a zone with some decent moisture!

Check out the articles below for information on:
- 2023 ARC/PLC Program Election Resources
- Corn/Soybean Disease Management Meeting – February 15th @ TWO locations!

2023 ARC/PLC Program Election
KSU Ag Economists Robin Reid and Jenny Ifft recently outlined considerations for producers as they make their 2023 elections under the current Farm Bill (March 15 deadline!). If you are interested in hearing their presentations, check out the videos and accompanying slide sets by visiting: https://agmanager.info/news/recent-videos/managing-risk-arc-plc-and-sco-2023-webinar-recording-and-slides. A number of other Farm Bill related papers are also available for you to review at: https://www.agmanager.info/ag-policy/2018-farm-bill.

Corn/Soybean Disease Management
The flyer below outlines information on a pair of upcoming meetings at which we’ll focus on corn and soybean disease management in NEK. KSU Extension Plant Pathologist Dr. Rodrigo Onofre will be on hand to share his disease observations and research efforts. We’ll share information on a three year SCN sampling program as well.

RSVP’s are not required, but IF you want to let us know you are coming it will help out rolls/refreshment planning. Our three office numbers are below, or reply to dhallae@ksu.edu and let me know you wish to attend. Special thanks to our generous sponsors listed below!
As always, I hope you enjoy this information. If you have any questions or would like further assistance, please feel free to reach out. If you would like to be removed from this mailing list, please reply to this message and type UNSUBSCRIBE. There’s no sense in filling up an inbox unnecessarily! Thank you!

Sincerely,

David G. Hallauer
