

2024 Tailgate Talk: Managing Invasive Bluestems (and other undesirable grasses)

Wednesday, May 22, 2024

5:30 (light meal)/6:00 Program

Location: **Scott/Kelli Thompson's** –
18050 K-116 Highway; approximately 7
miles E of the 16/75 Junction in Holton
(N Side of the Road - watch for signs;
GPS Coordinates: 39.4627760545070,
-95.61552510659)

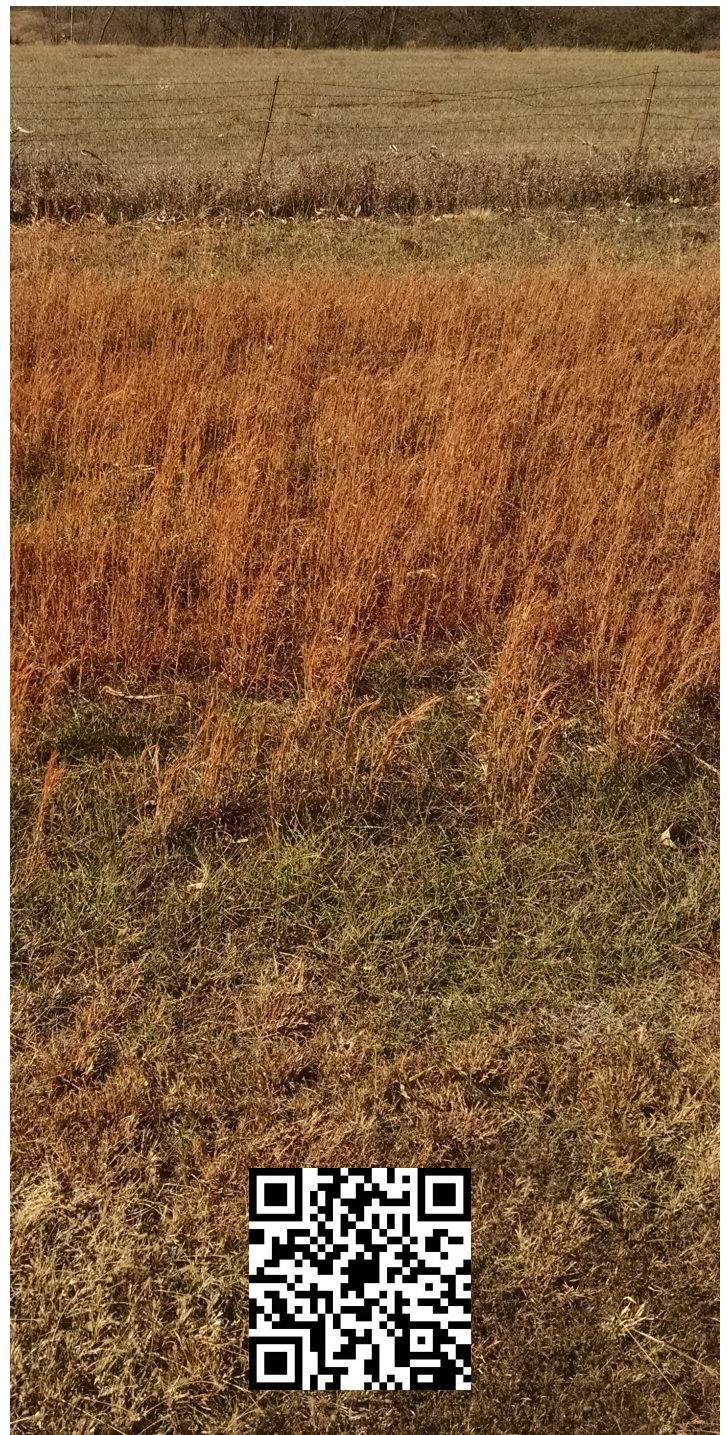

*Think 'bluestem', and native grasses like
Big and Little Bluestem come to mind.
Unfortunately, invasive bluestem species
like Broomsedge & Old World Bluestems –
plus other troublesome grasses - have
increased in our forage acreages as well.
Their quality is poor and ability to spread is
high, making good management a key to
maintaining production in cool AND warm
season pasture systems.*

*Join K-State Extension Range Management
Specialist Dr. Walt Fick and Area NRCS
Rangeland Management Specialist Dustin
Schwandt to hear about management
strategies to combat these species.*

K-STATE
